

All comments below pertain to the proposed 5250-5400 KHz Amateur Radio Band.

Item 1 (Power Limit): While the proposed 1500 Watt limit is fine, I would rather see a limit like 250 Watts.

Item 2 (License Class): There should be no Technician class operation in this new allocation. General and above only.

Item 3 (Sub-bands): This new band should be divided into two sub bands, one for narrowband signals (CW, Digital) and one for wideband signals (Phone). 5250-5300 for narrowband, and 5300-5400 for wideband.
